

Renewables Networking Platform

The 'Renewables Networking Platform' is a four-year project which began in March 2017. Its purpose is to provide a platform for discussion and dialogue on RES policies among different market actors such as renewable energy industry associations, national and EU Parliamentarians and the scientific community at European, national, regional and local level. To this end, the project foresees the organisation of various high-level policy events, as well as the monitoring of best practices and obstacles hindering the deployment of RES at national and sub-national levels.

Within this framework, the eclareon GmbH is responsible for analysing the technical, operational and administrative barriers hindering the development of RES in the European Member States with regard to their targets set in the RES directive. In addition, best practices fostering the deployment of RES across the EU are also identified.

Client/Financing:

- European Commission (https://ec.europa.eu/commission/index_de)

Project partners:

- EUFORES (<http://www.eufores.org/>)
- EREF (<http://www.eref-europe.org/>)
- Ecofys (<https://www.ecofys.com>)
- TU Wien (<https://www.tuwien.ac.at/>)
- Fraunhofer ISI (<https://www.isi.fraunhofer.de/>)
- energy cities (<http://www.energy-cities.eu/>)
